

F627 High Flow Gas Regulator

The F627 pilot operated pressure reducing regulator provides superior performance when used in fixed-factor billing applications. The Type F627 includes a factory-installed PL81 pilot and has external registration that requires a downstream control line.

Features

- **Accurate for Pressure-Factor Measurement Applications** — Pilot action controls pressure to within ± 1 percent of the absolute outlet pressure (PSIA) setting at full travel. This capability results in low-pressure variations over broad flow ranges and inlet pressure ranges.
- **Wide Range of Flow Capabilities** — A variety of body and orifice sizes are available.
- **Tight Shutoff Capability** — A flat disk of nitrile or fluorocarbon provides excellent shutoff capability.
