XARTU APPLICATION NOTE #118

Import Station in Field Manager

DATE: 15-June-15

This document explains how to properly import a station into Field Manager.

Import Stations

The **Import Station(s)** button can be used to add stations to Field Manager[™]. The zip and unzip capability is built into Field Manager[™] and does not require any external zip programs such as WinZip.

Note: You must be disconnected from the unit to perform this task.

To export a station or multiple stations

- from the <u>Field Manager™ User interface</u>. 1. Click the **Tools** button
- 2. Click the **Import Station(s)** button.
- 3. The **Import Station Wizard** appears. Read and follow the instructions from the wizard. Click **Next** to select the stations to import.

4. The **Specify Input File Name** window appears. Enter the file name in the provided field. The default filename and location is c:\Field Manager\Stations\Masters.zip. You can also click the Select button to set the location and/or name of the file to import.
