TOTALARC BURNER MANAGEMENT SYSTEM

The TotalArc Burner Management System (BMS) controls natural draft burners and monitors burner safeties and can be configured to monitor via electronic or pneumatic means. These safety control options provide remote relighting capabilities on demand.

ABOUT TOTALARC

Developed in 2012 by OGI Process Equipment, the TotalArc Burner Control family was designed to maintain your natural draft heater's operation reliably even under the worst conditions. The TotalArc Relighter maintains a UL listed Class 1 Division 2 certification.

AVAILABLE OPTIONS

- 12 VDC battery with solar backup
- 120 VAC with battery backup
- 24 VDC
- Remote monitoring
- Retrofit kits for existing heaters
- Available in stainless steel enclosure

APPLICATIONS

- Line Heaters
- Fuel Gas Heaters
- Tank Heaters
- Separators
- Treaters
- Process Equipment
- Combustors and Incinerators
- Glycol Reboilers
- Dehydrators

PRODUCT FEATURES

- UL Class 1 Div 2 control panel
- NEMA 4X panel
- Low power operation
- Redundant safety system
- Wide voltage range options: Solar, 24 VDC, 120 VAC
- Customer remote trouble contact
- Compact modular design allows easy installation and retrofit
- Unintrusive design that allows the heater to operate even if power is lost
- High visibility status indicator light
